FIRECODEX

Basic User Guide v1.3
Last Updated May 2, 2025

FireCodeX - Log In: (https://firecode.gov/)

Click on **Agree** to accept *Terms of Service Statement and Application Terms of Use.*

[Return to Top](#)

Click on **DOI / FAMAAuth Sign In** or **Read Only (No Login Required)**

Try out the **Read Only** to see what you can do without a login.

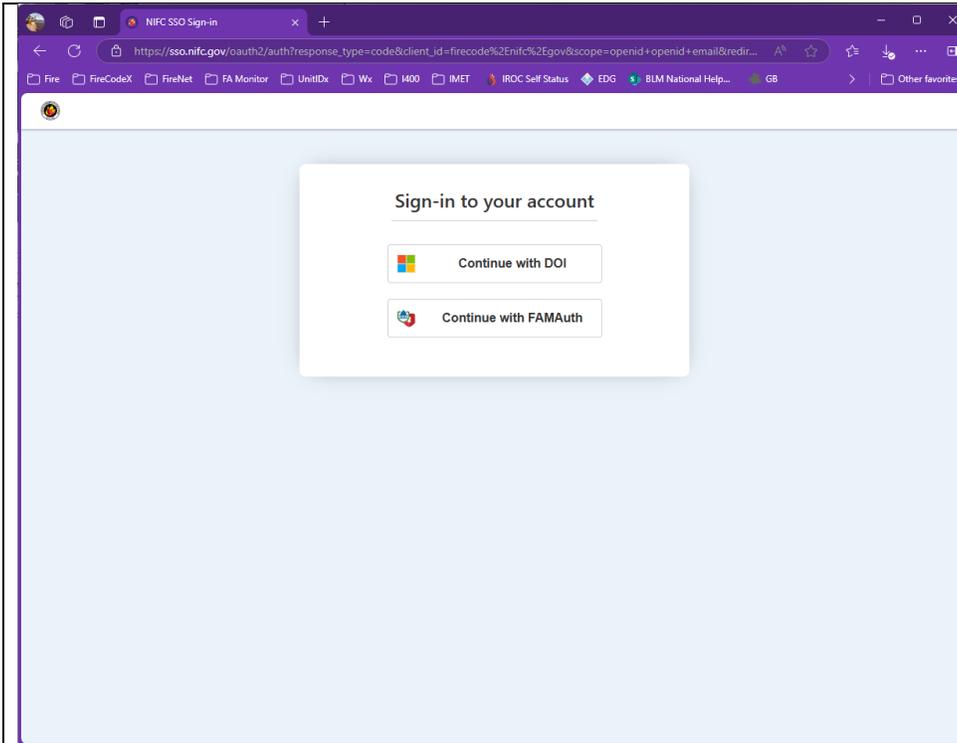

Also notice there are: **Announcements and System Notes** for the user to read/be aware of.

[Return to Top](#)

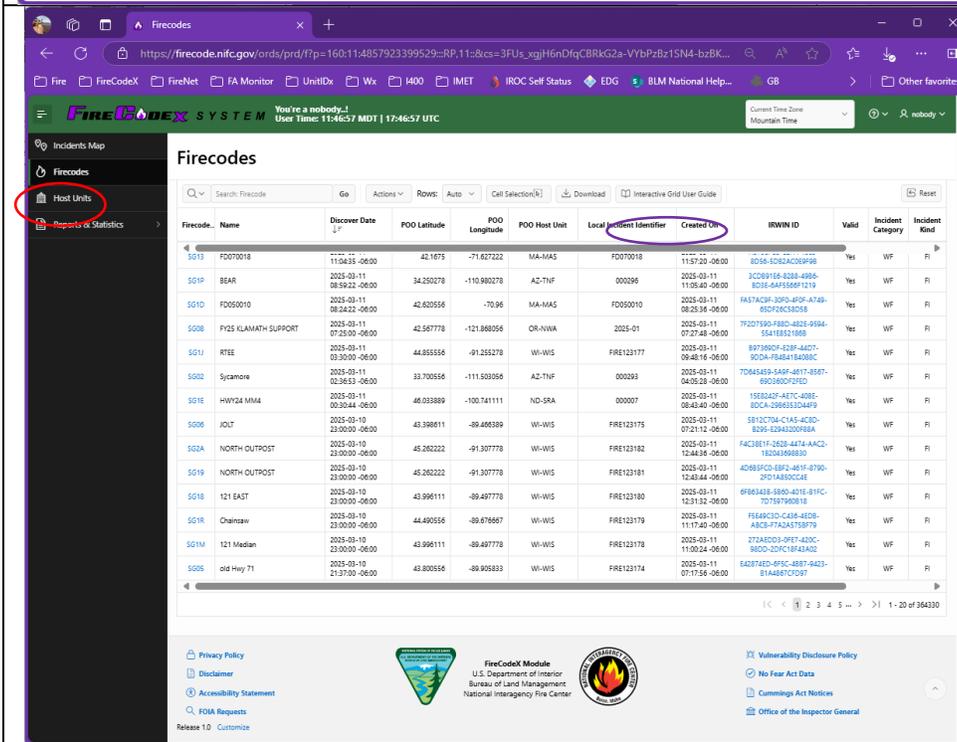

FIRECODEX

Basic User Guide v1.3
Last Updated May 2, 2025

If you clicked on **DOI / FAMAUTH Sign In**, you will now select either *Continue with DOI* (DOI users only) or *Continue with FAMAUTH* (any federal user and/or Login.gov user).

[Return to Top](#)

Firecodes:
Click on **Firecodes** on the left side menu.

This shows every firecode that has been used in history of FireCode application.

Lesson: This is what is referred to as an **“interactive grid”** (see link to guide). It is a very powerful tool for users to: search, select new pieces of info (e.g. add columns), sort, filter, export, customize, etc.

SEARCH:

If you enter anything in the initial **Search Box** at top left, it will search *firecode* by default, but you can select specific fields or **All Text Columns**.

If you click on the magnifying glass, it will allow you to select/limit the list of available data elements from which to search.

Example: Name = lizard

SEARCH:

Another way to search is to click on any column name.

In this example, one can click heading **POO Host Unit** and start typing any letters and you will notice the system will “type ahead” and reduce the list to what you have typed.

Quick Tip: If you see an **IRWIN ID** and click on it, it connects to IRWIN and shows you what IRWIN has about the firecode; although, the link won't work for older firecodes in UAT (but will when we go live).

FIRECODEX

Basic User Guide v1.3
Last Updated May 2, 2025

The screenshot shows the FireCodeX search interface. The search criteria bar at the top contains two filters: "Name contains TJUANA JOHN" (with a green checkmark icon) and "POO Host Unit equals NV-EID" (with a red X icon). Below the search bar is a table of results with columns: Firecode, Name, Discover Date, POO Latitude, POO Longitude, POO Host Unit, Local Incident Identifier, Created On, IRWIN ID, Valid, Incident Category, and Incident Kind. The table lists three entries for 'TJUANA JOHN'.

Firecode	Name	Discover Date	POO Latitude	POO Longitude	POO Host Unit	Local Incident Identifier	Created On	IRWIN ID	Valid	Incident Category	Incident Kind
G061	F/A TJUANA JOHN	2012-07-29 14:45:00 -06:00	40.833056	-115.789167	NV-EID	100936	2012-07-29 15:58:11 -06:00		Yes		
G0R1	TJUANA JOHN	2011-08-29 16:42:00 -06:00	41.777778	-114.540556	NV-EID	001122	2011-08-29 18:57:37 -06:00		Yes		
B32Y	TJUANA JOHN	2005-08-02 15:21:00 -06:00	41.759444	-114.577778	NV-EID	817	2005-08-02 19:43:31 -06:00		Yes		

SEARCH:

To remove a search criterion, either click on the green check mark (this will leave on the criteria row if you want to re-select later) or click on the X to remove that criterion.

[Return to Top](#)

The screenshot shows the FireCodeX search results page. The 'Discover Date' column header is highlighted with a red circle, showing up/down arrows for sorting. The table below contains a large number of rows with various firecode details.

Actions:

To DELETE/EDIT a Report:
Select the report from the dropdown, click Actions/Report/Delete

Reminder: Select Primary Report to go back to the default report (none of your criteria).

[Return to Top](#)

Firecodes

Search: Firecode [Go] BLM in Last Month [v] Create Firecodes [x] Reset

Columns: Agency, Discover Date, POO Latitude, POO Longitude, POO Host Unit, Local Incident Identifier, Created On, IRWIN ID, Valid

Download

Choose Format:

- CSV
- HTML
- PDF
- Excel

Actions:

Download:
Select Actions/Download to export data to CSV, HTML, PDF, or Excel.

CAUTION: Please try to limit (via filters) the data that you are downloading. Every firecode (more than 300,000) created is available. The system will bog down and timeout before you get your results.

[Return to Top](#)

FIRECODEX

Basic User Guide v1.3
Last Updated May 2, 2025

Create Firecode:

A firecode can be created either by clicking on the **Create/Edit Firecode** under Firecodes on the left menu, or clicking the green **Create Firecode** button on the upper right.

Reminder: Make sure to put a **negative sign (-)** in front on Longitude for fires in our hemisphere 🌍

[Return to Top](#)

Edit/Deactivate Firecode:

A firecode can be edited by clicking on the firecode (e.g. R9AR) on the Firecodes screen.

Depending upon your permissions, you can either view or edit many of the fields.

Once you have made changes, click **Apply Changes** button in bottom/right corner.

Tip: Notice the banner at top? You can only edit an incident within your GACC.

Host Units:

This is data received automatically from the UnitIDx system.

If you click on a Unit ID (e.g. NV-BMD), you will see all firecodes associated with that Unit ID.

Once again, this is an Interactive Grid, so many of the same advanced data features are available.

Reports & Statistics

REST APIs

URI	Description
Incidents in Last Day	Return incident data for the last day, based on create_date, not discovery_date.
Incidents in Last 7 Days	Return incident data for the last seven days, based on create_date, not discovery_date.
Query Firecode	Return incident data for a specific Firecode. Replace ABCD with the actual Firecode.
Updated Incidents Since	Return incident data that have been modified since provided date/time with time zone. Example parameter: From_date=2018-05-28T15:20:08Z+07

FIRECODEX

Basic User Guide v1.3
Last Updated May 2, 2025

Roles:

- **Nobody:** Read Only user that has limited access to primary system functions.
- **Data Entry:**
 - Can Create firecodes within any designated Geographic Area Coordination Center (GACC)
 - Modify firecode record attributes within their designated GACC
 - Cannot edit IRWIN ID
 - Can update their own name, email, or Host Unit (must remain within assigned GACC)
- **GACC Administrator:** In addition to Data Entry role, this user can Create/Edit/Deactivate a firecode across GACC boundaries:
 - See and Manage/Pending Users (add/edit Data Entry, GACC Admin roles)
 - GACC admin (anywhere, not restricted by GACC)
 - Approve any Data Entry accounts within their GACC
 - Can approve other GACC Admins (within their own GACC)
 - GACC Admin has National Data Entry (Can create a Firecode for any valid Host Unit)
 - Cannot edit IRWIN ID
 - Can create firecode from IRWIN ID
 - Can assign Contingency Code (within assigned GACC)
- **National Administrator:** In addition to GACC Administrator role,
 - See and Manage/Pending Users (add/edit Data Entry, GACC Admin, and National Admin roles)
 - GACC admin (anywhere, not restricted by GACC)
 - Can edit IRWIN ID of Firecode
 - Can assign Contingency Codes (any, not restricted by GACC)
 - Can view IRWIN Logs
 - Can view Application Logs (APEX Logs; Jobs; Automations; APEX Web Services)

FIRECODEX
Frequently Asked Questions

FireCode System Questions

- Who is authorized to access the FireCode system?
- What can my User ID be?
- What do I do if I forget my password?
- Why is the Latitude and Longitude required and what are the limits?
- Can we issue generic User ID accounts since there are short-term detailers in dispatch offices during fire season?

FireCode Business Questions

- Do you create a firecode for each false alarm?
- If you create a complex of fires, do you have to deactivate firecodes and just use the complex code?
- Can I create a complex code and place the fires underneath the new code to simplify things for dispatching?
- If we have a non-federal fire, how do we create a firecode and if so, who creates the code?
- Is a firecode the fire number?

Agency Specific FireCode Questions - Forest Service

- How are prefixes used with FireCode?
- Why can't the FS automatically create all firecodes issued in their finance system?
- If the FS sends resources to a DOI Fire Use fire, do we use a "G" then the DOI character with the four-character code issued from FireCode?
- If a fire starts on the BLM and spreads to the FS, what code do we use?
- What code do I use for FS resources responding to a request for assistance from the protecting agency of a third agency's land?
 - A fire was initially managed as a fire use fire and the code generated was established with a "G" in the National Finance Center (NFC). It becomes a declared wildland fire. What do we use now for a code?
 - If the fire is reimbursable, why don't I use "R" in lieu of the "P"?

FireCode System Questions

About FireCodeX

The FireCodeX application generates standard fire incident management financial codes for the incidents for all fire agencies and distributes these firecodes to other applications via the Integrated Reporting of Wildland-Fire Information system (IRWIN) and to both U.S. Forest Service (USFS) and Department of Interior (DOI) financial systems. FireCode allows the wildland fire agencies to track the costs of wildfire suppression more accurately across multiple jurisdictions. All federal wildland fire suppression agencies (BLM, BA, FWS, NPS, USFS) utilize the FireCode application to generate the fire code project identifiers.

FireCodeX is continually being updated with bug fixes, user enhancements and reliability improvements. Below is a list of things we have accomplished to date:

Issue	Issue Type	Title	Completed Date	Fix Version
▼ Sprint 23				
FAICDX-286	Bug	Dark Theme: Data Pickers for Data Pickers - Color Conflict	2025-05-11 11:19:22 -0800	Version 1.0
FAICDX-289	Task	Include Legacy FAQ under Help	2025-05-11 10:23:27 -0800	Version 1.0
FAICDX-310	Task	Standardize all Indexes, Triggers, and Constraints	2025-05-10 14:41:17 -0800	Version 1.0
FAICDX-307	Task	Rename USER ID Column in User Table	2025-05-09 16:39:15 -0800	Version 1.0
FAICDX-306	Task	Rename USER ID Column in User Table	2025-05-07 16:39:15 -0800	Version 1.0
FAICDX-304	Task	Include Sample ID Queries & User Guide	2025-05-06 16:51:17 -0800	Version 1.0
FAICDX-287	Task	Rename Incident Type Column	2025-05-06 11:35:58 -0800	Version 1.0
FAICDX-302	Task	Strip HTML Tags from Record Preview	2025-05-06 10:48:48 -0800	Version 1.0
FAICDX-303	Task	Add FCI Logo to Emails	2025-05-06 08:58:02 -0800	Version 1.0
FAICDX-300	Task	Banner Warning For Current Environment	2025-05-06 08:34:50 -0800	Version 1.0
FAICDX-295	Bug	Created By Updater to Updated By	2025-05-06 07:24:22 -0800	Version 1.0
FAICDX-291	Task	Add Enhanced Error-handling Function Back After Edits	2025-05-07 08:52:34 -0800	Version 1.0
▼ Sprint 24				
FAICDX-278	Bug	Fix REST Data Source Not Found Issues After Patch	2025-05-11 11:20:04 -0800	Version 1.0
FAICDX-282	Task	Make DOI Notice of Monitoring Page	2025-05-07 16:20:32 -0800	Version 1.0
FAICDX-293	Task	New FCI Theme Created	2025-05-24 16:51:06 -0800	Version 1.0
FAICDX-296	Task	Rename Incident Type Column	2025-05-24 10:19:04 -0800	Version 1.0
FAICDX-284	Task	Make Themes With Logos	2025-05-21 07:11:50 -0800	Version 1.0
FAICDX-225	Task	Update GACC Layers REST Data Source on Jan 10, 2025	2025-02-19 12:28:28 -0800	MPR 1.0
